About — Landing Page Design Concepts

Home page — reached via the “About” item in the top navigation. Three design iterations of this landing page are shown below for reference.

Version 1 — Early concept (unframed cards)

Early design concept — superseded by later versions.

Design & color notes: A warm gold-to-amber gradient hero band anchors the page, paired with a near-black closing band for contrast. The three pathway cards use flat, unframed panels in cream, olive-green and slate-blue, each centered on a soft two-tone swirl mark (sage/terracotta, cream/terracotta, and pink/yellow/lilac respectively). A pale sage-green strip separates the cards from the closing band.

About — Landing Page Design Concepts (continued)

Version 2 of 3 — framed-artwork treatment

Version 2 — Framed artwork treatment

Intermediate design — introduced the framed “gallery” card treatment.

Design & color notes: The hero band moves to a cool, light slate-blue, and the three pathway cards are restyled as framed pictures — a honey-wood frame and cream mat around each canvas, topped with a gold pill badge (RESILIENCE / VETERANS / SUPPORT). Canvas colors are light sky-blue, olive-green and slate-blue, each holding a small abstract swirl mark. An olive-green trust-badge strip and a dark navy closing band bookend the page, matching Version 1's structure.

About — Landing Page Design Concepts (continued)

Version 3 of 3 — current live design

Version 3 — Current live design

Full-page capture of the live site.

Design & color notes: Keeps Version 2's framed-artwork card treatment, but darkens the hero band to a deep charcoal-navy for stronger contrast against the gold pill badges, and relabels the three pathways WAR / TERROR / DISASTER to name the specific hardship each path addresses. Canvas and frame colors are unchanged from Version 2.

Structure & sections

This is the site's landing page. The header carries the primary navigation (About, Find Support, Our Professionals, Community), a Donate button, a notification bell, a language switcher, and an account menu — repeated on every page in this document. Below it sits a hero band with an eyebrow tag, a headline, supporting copy, two CTAs and a trust strip. Underneath, a centered “Why GESA exists” statement leads into a three-card “Choose your pathway” grid, each card with a label, description and its own CTA. The page closes with a dark “Be part of the change” call-to-action band.

Find Support

The site's About page (/about) — reached via the “Find Support” item in the top navigation

Design & color notes

A calm, editorial layout on an off-white background: a dark navy serif headline pairs with a square graphic card in a warm cream frame holding a soft pastel green/blue/peach swirl mark. Below, a light blue-gray “How GESA works” row sits above a warm gold founder-spotlight band, closing with the same dark navy CTA band used on the About page.

Our Professionals

/therapists

Full-page capture of the live site.

Design & color notes

A warm gold page-header band sits above a two-column layout on a light background: a left-hand filter sidebar and a card grid of therapist photos on the right. Each card uses a clean white background with dark navy action buttons, keeping the directory itself neutral so the gold header and therapist photos stand out.

Structure & sections

The therapist directory. A gold page-header band sits above a two-column layout: a left-hand filter sidebar (name search, therapist-type list, language dropdown, session-duration and gender toggles, plus a “Join us as a therapist” CTA) and a responsive card grid on the right. Each therapist card shows a photo, name, specialty, language tags, and Book a Session / Message actions. The page ends with a dark closing band repeating the donation call to action.

Community

Support-group / pathway section, reached via the “Community” item in the top navigation

Full-page capture of the live site.

Design & color notes

Opens on a cool slate-blue hero band, followed by a warm gold “Why GESA exists” statement band — the same gold tone used elsewhere for emphasis bands. The “Choose your pathway” cards and support-group list sit on a neutral light background, with a dark navy card treatment for each support-group entry to keep the grid visually grounded.

Structure & sections

The page opens with a hero band (eyebrow, headline, two CTAs, and a small links row), followed by a gold “Why GESA exists” statement band, a three-card “Choose your pathway” grid, a preview grid of six community support-group cards, and a closing “In their words” testimonial row.

Donate

/donate

Full-page capture of the live site.

Design & color notes

A restrained, light-background layout centered on a bordered donation panel with a dark navy “Give Once / Give Monthly” toggle and preset-amount buttons. Supporting impact cards use a neutral pale background, and the page closes with the same dark navy CTA band used across the site for consistency.

Structure & sections

Opens with an eyebrow tag, headline and supporting copy, plus a primary CTA. The centerpiece is a bordered donation panel: a Give Once / Give Monthly toggle, four preset amounts (€25 / €50 / €100 / Custom), helper copy, and a “Make my gift” button. Below that, a three-card “What your gift helps make possible” grid (Access, Connection, Continuity) explains the impact, and the page closes with a dark “One choice can carry support across the world” band.

Footer

Global footer — present at the bottom of every page on the site

Full-page capture of the live site.

Structure & sections

The shared footer used across the entire site. It carries the GESA brand mark and tagline on a dark navy background, three link columns (Explore, Support, Legal), and an inline “Help us grow” contact form (name, phone, subject dropdown, email, an age/privacy consent checkbox, and a submit button). A social-icon row and a “Trusted Partners” strip run along the bottom.

Privacy Policy

/privacy-policy

Full-page capture of the live site.

Structure & sections

A long-form legal page in 13 numbered sections: scope, who GESA is, data collected, how data is used, legal bases for processing, data sharing, international transfers, retention, user rights, children and minors, security measures, policy updates, and a contact section.

Cookies Policy

/cookies-policy

Full-page capture of the live site.

Structure & sections

A shorter legal page in 7 numbered sections: what the policy covers, what cookies are, the categories of cookies used (essential, functional, analytics, marketing), why they're used, third-party tools, how visitors manage cookie preferences, and a contact line.

Legal Notice

/legal-notice

Full-page capture of the live site.

Structure & sections

A compact legal page covering organization and registration details, contact information, the purpose of the website, a "not a medical or emergency service" disclaimer, intellectual property, and a limitation-of-liability section.

Accessibility Statement

/accessibility-statement

Full-page capture of the live site.

Structure & sections

States GESA's accessibility commitment and its WCAG 2.1 Level AA target, lists the measures in place (semantic structure, keyboard navigation, color contrast, scalable text, alt text, visible focus states, screen-reader support), and gives a contact route for reporting barriers, closing with an "ongoing improvement" note.

Terms & Conditions

/terms-and-conditions

Full-page capture of the live site.

Structure & sections

The longest legal page, in 13 numbered sections: acceptance and scope, eligibility, accounts and security, description of services, user conduct, a “not an emergency service” disclaimer, intellectual property, third-party links, warranty disclaimer and liability limits, indemnity, termination, governing law, and how changes to the terms are communicated.

Accessibility Adjustments Widget

Opened via the floating accessibility launcher icon, present on every page

The floating launcher icon (shown above) sits in the bottom-right corner of every page and opens the panel below.

Accessibility Adjustments panel.

Structure & sections

A floating panel rather than a page of its own. It offers a language selector, a set of “Content modules” toggles (font size, line height, readable font, big cursor, letter spacing, text alignment, font weight), and “Color modules” toggles (light contrast, high contrast) below.

AI Matching Support & Browse Therapist

Modal flow — opened from the “AI Matching” button on the Find Support hero

Step 1 — Choice screen

“How would you like to find support?” choice screen.

Step 2 — AI Matching wizard, Step 1 of 4 (Preferences)

AI Matching wizard — “Your preferences” step.

Structure & sections

Visitors choosing “AI Support” land on a 4-step wizard (Preferences, Format & Location, Feelings, Matches). Step 1 collects an optional preferred treatment type (pill-style single-select options, defaulting to “No preference”), a therapist gender preference, and a preferred language, before continuing to the remaining steps.

AI Matching Support & Browse Therapist (continued)

“Browse Therapist” path from the same choice screen

The image shows a modal titled "Find a therapist" with a close button (X) in the top right corner. Below the title is the instruction "Choose how and where you would like to receive support." The form is divided into two main sections: "Type of session" and "Location".

Type of session *

- Online**: Represented by a headset icon and the text "Meet securely from wherever you are."
- In-person**: Represented by a location pin icon and the text "Find professionals available near your selected location."

Location

Country *: A text input field with the placeholder "Start typing your country..."

City / address (optional): A text input field with the placeholder "e.g. Tel Aviv"

☐ Use my current location

At the bottom of the modal is a large, dark grey button with a magnifying glass icon and the text "Start browsing therapists".

“Find a therapist” modal.

Structure & sections

Visitors choosing “Browse therapist” instead see a short modal asking for session type (Online / In-person) and location (country, optional city, or “use my current location”), then continue directly into the Our Professionals directory with those filters applied.

Emergency Support (Crisis Services)

“Need immediate emergency support? Find local crisis services.” — linked from the site's hero bands and footer

“Find a helpline” crisis-support page.

Structure & sections

A dedicated helpline finder, kept visually distinct from the rest of the site (its own soft blue palette rather than GESA's navy/gold system) and offering a prominent “Quick Exit” control. Visitors search by country for local helplines, see key partner organizations (International Association for Suicide Prevention, Lifeline International, and 1,700+ helplines across 175+ countries), and a short explainer on what to expect from a helpline (Quick, Talk with a human, Confidential).

Sample Logo Concepts

Exploratory logo treatments — for future design consideration only

The images below are exploratory logo-mark treatments, each applying a gold-foil / gold-thread finish to GESA's existing swirl mark against different backgrounds and lighting. These are presented purely as visual direction options for a possible future logo refresh — no version has been finalized, approved, or put into production. Any of these directions can be developed further, combined, or set aside entirely at the client's discretion.

Sample Logo Concepts (continued)

Additional exploratory logo treatments

Appendix — Notes for Review

Issues observed on the live site while these captures were taken

Two issues turned up on the live site while these captures were taken. Neither has been changed as part of preparing this document — they are flagged here since they are visible directly in the screenshots above.

1. Legal pages render raw Markdown

Privacy Policy, Cookies Policy, Legal Notice, Accessibility Statement and Terms & Conditions all display literal “##” heading markers as plain text instead of rendering them as headings (visible throughout sections 07–11 above). This is a content-rendering bug, not a copy issue — the underlying text is fine.

2. Unfilled placeholder text on Legal Notice

The live Legal Notice page (section 09) shows bracketed template text that was never filled in — for example [street, city, postal code, country], [registration / charity number] and [+xx xxx xxx xxxx]. This is visible to real site visitors right now.

Happy to fix either of these on request — no code changes have been made as part of putting this document together.

Other Color Palette UI Design

Additional reference mockups exploring alternate color directions — for future design consideration only, none of these are live or approved

The images below are additional full-page mockups exploring different color palettes for the Home page, the Find Support/About page, Our Professionals, and the founder-spotlight section. Like section 15's logo concepts, these are presented purely as visual reference samples — no version shown here has been finalized, approved, or put into production.

Home page — deep-navy palette

Reference mockup — not live on the site.

Hero band and pathway-cards section on a solid deep-navy background, with an olive-sage trust-badge strip and a near-black closing band.

Home page — cool-gray palette (current direction)

Reference mockup — not live on the site.

Hero band, pathway-cards section, and trust-badge strip on a cool neutral gray, with a plain dark-navy closing band — the direction most recently applied to the live site.

Other Color Palette UI Design (continued)

Additional reference mockups, continued

Home page — warm cream palette with navy accents

Reference mockup — not live on the site.

Hero band and cards section on a warm cream/ivory background, paired with a dark-navy trust-badge strip and closing band.

Find Support/About page — alternate layout with world-map motif

Reference mockup — not live on the site.

A different page structure altogether: a centered world-map graphic behind the headline, a dark-navy “Why GESA exists” statement band, and six community-pathway cards in sage green.

Other Color Palette UI Design (continued)

Additional reference mockups, continued

Our Professionals — sage-green card palette

Reference mockup — not live on the site.

The therapist directory with sage-green card backgrounds in place of the current neutral/white cards, keeping the same filter sidebar and card layout.

About — founder-spotlight alternate palette

Reference mockup — not live on the site.

The “Meet Ilana O'Malley” founder section on a solid warm gold/tan background instead of the current treatment.

Other Color Palette UI Design (continued)

Additional reference mockups, continued

Home page — current live capture

Live screenshot of the deployed site, not a mockup.

Full-page screenshot of the Home page as currently deployed: the cool-gray palette from the sample above, now live, with the gold hero-band accent softened to a fading glow rather than a hard-edged band, removing the seam previously visible where the gold met the gray section below.

Operational Workflow Clarifications

Open questions awaiting a decision — tracked as item 12 on the team's task list in Plane

The five questions below cover behavior that hasn't been decided or built yet. Each needs an answer from the client/product owner before the corresponding feature can be designed or implemented — none of this reflects current site behavior.

- 12.1** Should the “In crisis?” button show local emergency numbers based on the user's location? Or should users select their country and see that country's emergency numbers?
- 12.2** What message is shown when someone under 18 tries to sign up? Is it age-appropriate, and does it direct them to help resources?
- 12.3** How should the system score and rank client-therapist matches? What is the prescribed criteria for matching?
- 12.4** If a therapist is deactivated, what happens to their existing scheduled appointments?
- 12.5** Should the booking calendar enforce a minimum notice period, or redirect very short-notice requests to the crisis hotline?
